Camo Cord™

Ideal for the ultimate sportsman! NEW Camo Cord™ extension cords from Coleman Cable – the maker of “America’s Toughest Cords.” These camouflage extension cords are manufactured with a unique process using a clear PVC jacket over a camouflage pattern which is resistant to fading, peeling or wearing away. The SJTW jacket provides rugged durability and resists moisture, abrasion and prolonged exposure to sunlight and the elements. Suitable for job-sites, workshops, and outdoor everyday usage. They can also be used to conceal the extension cord in landscaping applications.

Camo Cord extension cords are made in the USA. Available in 14 and 12 gauge and in 25 ft., 50 ft. and 100 ft. lengths. Tough, durable, outdoor-rated...and in camo-design! Camo Cord extension cords are ideal for the ultimate outdoorsman.
